

Positions

There is an exciting opportunity in the group of Dr. Vivek Tiwari for students with interest in studying human brain disorders using magnetic resonance imaging and spectroscopy. The lab is seeking two highly motivated candidates as Project students. Candidates with Master's/B.Tech/M.Tech degree in biomedical imaging, biotechnology, biochemistry, chemistry with interest in Magnetic Resonance Imaging and Spectroscopy would be better fit for this position.

Interested candidates are requested to contact the principal investigator Dr. Vivek Tiwari (vivekt@iisc.ac.in)

Project Assistant at Centre for Brain Research (CBR) **An Autonomous Centre of Indian Institute of Science, Bengaluru**

We are seeking two highly motivated student for studying brain disorders using Magnetic Resonance Imaging (MRI) and Spectroscopy (MRS). This is an exciting opportunity for students with interest in applying and translating Magnetic Resonance Imaging and Spectroscopy to characterize metabolic and functional changes in aging and gliomas in human brain. Interest in biophysics, acquaintance with NMR Spectroscopy and neurosciences and expertise in MATLAB is desirable. Candidates with Master's/B.Tech/M.Tech degree in biomedical imaging, biotechnology/biochemistry, chemistry would be suitable for this position. Salary will commensurate with qualifications and experience of the candidate. Candidates who are interested in applying should forward their (i) CV along with (ii) a cover letter and (iii) names of two referees to Dr. Vivek Tiwari (vivekt@iisc.ac.in). Selected candidates will be called for interview.

Contact detail is provided below.

Dr. Vivek Tiwari,
Assistant Professor
Centre for Brain Research
SID Complex,
Indian Institute of Science
CV Raman Avenue
Bengaluru 560012
